Dear Sir/Madam,

I am writing because I don’t want people to die because of cigarettes. I don’t want to see cigarettes being made because people can get cancer and their kids will be alone. Cigarettes are bad because people can get cancer and die fast.

On the ads we watched at school the man was waiting for his test results and then when he looked at the little boy, he was sad that he didn’t have a mum and dad. Then he looked at his phone at his kids that he does not want his kids to be alone.
